Hope in Dark Times

Hope does not arrive dramatically.
It does not shout or promise miracles.
It comes quietly,
telling you to hold on
just a little longer.

In dark times, hope looks like endurance,
like choosing not to give up
even when the future feels unclear.

Hope is fragile,
yet it survives where logic fails.
It exists not because conditions are perfect,
but because the human spirit refuses to collapse.

As long as hope remains,
darkness never truly wins.
